

VILLANOVA UNIVERSITY IMMUNIZATION POLICY

Vaccine preventable diseases continue to occur on American college campuses. Immunizations are the best way to help combat outbreaks of these diseases. In accordance with Pennsylvania state law and based on recommendations from the American College Health Association, the University requires the following prematriculation immunizations of incoming freshman students and undergraduate transfer students:

- MMR series (Measles, Mumps, Rubella)
- Polio series
- DPT series (Diphtheria, Pertussis, Tetanus) and Booster vaccine as needed
- Varicella two dose series
- Hepatitis B series
- Meningitis vaccine
